## Motors

- Motor options for roller shades of all sizes for both residential and commercial applications. Available for use with fascia, cassette, dual shades, and more...
- Compatible with tube sizes ranging from 1 1/4" to 3 1/4" diameter - Shades can be made up to 12 ft. wide
- Lithium ion battery powered motor—battery is inside the motor tube. No battery wand or disposable batteries.
- Battery motors can be charged with plug-in charger or optional solar panel. One charge lasts 6 months to 1 year of normal usage.
- Two-way RF communication. Motor provides shade position and battery status.
- 12V DC Low-voltage motors with power supply for plug-in into existing outlet
- 120V AC power motors for direct wire or plug-in into existing outlet
- Easy installation like a manual shade and compatible with existing Skyline and R-Series bracket systems.
- Simple limit setting and adjustment. Leveling control option.

### RF Wireless Control

- Hand held remotes—1 and 15 channel. Features leveling control and ability to hide unused channels.
- 5 Channel flush wall switch. Easy installation without need to cut into wall.
- Cut in wall switch—1, 2 and 15 channel.

### Mobile App Control

- Control from smartphone app whether home or away. Wifi hub connects to home or office system
- Bi-directional communication—visualize position of shades and battery health of motors
- Create rooms, set timers & scenes and more!
- Remote free setup using the app's step by step wizard
